

Value Collator System

Batch Counting Capable

Overview:

This entry-level collator system is ideal for kit fulfillment and product literature collating. Use as a stand-alone gatherer or roll it up to your automatic L-sealer for increased automated productivity. The system can accommodate up to four feeders to reliably separate, singulate, and deliver a wide variety of product types and sizes to the collator base. Its flexibility enables you to configure any of the feeders for batch counting or single-shot feeding.

Applications:

- Batch Counting
- Kit Fulfillment
- Literature Collating
- Packaging Fulfillment
- Automatic Wrapping
- Stand-alone Collation
- Polybagging

Features:

- Reliable product separation
- Tool-less adjustments for easy setups and changeovers
- Easy to learn and operate
